PROFESSIONAL SUMMARY

Results-driven .NET Developer with 2+ years of experience building scalable backend systems and full-stack enterprise applications using C#, ASP.NET Core, Web API, Entity Framework Core, SQL Server, and Angular/ReactJS. Experienced in designing RESTful APIs, optimizing database performance, implementing authentication and authorization mechanisms, and delivering high-performance applications in Agile environments. Strong understanding of Clean Architecture, SOLID principles, dependency injection, asynchronous programming, and cloud-integrated solutions using Azure and Cosmos DB.

TECHNICAL SKILLS

Languages	C#, JavaScript, TypeScript, SQL
Backend	ASP.NET Core, .NET, Web API, REST APIs, Entity Framework Core, LINQ, Dependency Injection, Authentication & Authorization, Microservices, Async Programming
Frontend	Angular, ReactJS, HTML5, CSS3
Databases	SQL Server, Cosmos DB
Cloud & Tools	Azure, Azure Functions, Git, Swagger, Postman
Concepts	Clean Architecture, SOLID Principles, RBAC, Agile Methodologies, Performance Optimization, API Design

PROFESSIONAL EXPERIENCE

Software Developer <i>Tezo Digital Solution LLP, Hyderabad</i>	Jan 2024 – Present
- Engineered scalable backend services using ASP.NET Core Web API and C#, supporting enterprise HRMS applications with high availability and maintainability. - Developed and optimized RESTful APIs, reducing average response times by 25% through efficient query optimization, asynchronous processing, and improved API design. - Improved SQL Server and Entity Framework Core performance by optimizing complex queries, indexing strategies, and data access patterns, resulting in 40% faster execution. - Implemented secure Role-Based Access Control (RBAC), authentication, and authorization workflows to strengthen application security and access governance. - Delivered full-stack features using Angular, TypeScript, and .NET, collaborating closely with cross-functional teams in Agile development cycles. - Participated in peer code reviews, debugging, and performance tuning initiatives to improve code quality, maintainability, and production stability.	

PROJECTS

Hiro Module – Keka HRMS	Aug 2024 – Jul 2025
- Contributed to the backend development of enterprise HRMS modules using ASP.NET Core and SQL Server, improving system stability and reducing production issues by 35%. - Designed and implemented configurable Salary Period Management supporting weekly, bi-weekly, and monthly payroll cycles with extensible business logic. - Developed secure feedback workflow APIs with RBAC, validations, and role-based operations to streamline employee-manager interactions. - Enhanced REST API reliability and optimized data processing workflows, reducing API failures and improving application responsiveness. - Built face registration and verification APIs integrated with AWS Rekognition to enable secure biometric authentication workflows. - Collaborated with product, QA, and frontend teams to deliver scalable and maintainable features aligned with Agile sprint goals.	
Demo Project – Keka Client Demo System	Oct 2025 – Present
- Optimized complex SQL queries and stored procedures to improve database performance, execution efficiency, and demo environment responsiveness. - Refactored legacy SQL scripts and backend logic to improve readability, maintainability, and debugging efficiency.	

- Investigated and resolved client-reported data inconsistencies, ensuring accurate data representation during live product demonstrations.
- Played a key role in stabilizing demo environments, improving reliability and reducing disruptions during client onboarding and stakeholder presentations.
- Worked closely with cross-functional teams under tight deadlines to troubleshoot production-like issues and ensure seamless client experiences.

EDUCATION

B.Tech in Computer Science and Engineering

2020 – 2024

Aditya Engineering College, Surampalem

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Java Certification — IT Specialist JavaScript Certification
- HackerRank Certifications in Java, Python, and Problem Solving
- Solved 330+ LeetCode and 250+ GeeksforGeeks coding problems, demonstrating strong problem-solving and data structure fundamentals
